

HOW TO READ YOUR CHILD'S SCORE REPORT

The Michigan Student Test of Educational Progress, or M-STEP, is Michigan's state standardized test that measures critical thinking and problem-solving skills based on Michigan's academic standards. Scores available now, will be used by schools and districts to improve instruction. The results identify what students know and are able to do in relation to Michigan's academic standards. To learn more about the M-STEP, visit the [M-STEP web page](http://www.michigan.gov/mstep) (www.michigan.gov/mstep).

Results are now available earlier than ever, meaning that teachers will start the school year understanding their students' individual strengths and areas in need of improvement.

Score Report Components

1

Student Overall Performance Level and Scale Score —

Students receive a numerical scale score and, based on that score, are ranked in one of four performance levels: Not Proficient, Partially Proficient, Proficient, or Advanced. This section of the report provides your student's numerical score and performance level.

2

Claims — Assessments in ELA and mathematics include sub-categories, called Claims, which relate directly to Michigan's learning standards for those subjects. This section describes the claims that were assessed.

3

Claim Performance Indicators — The report shows at a glance whether your student's score on this claim shows adequate progress (▲ blue triangle), calls for attention (○ yellow circle), or indicates high risk of falling behind (▼ orange, downward pointing triangle).

4

Disciplines — Assessments in science (grades 4 and 7) and social studies (grades 5 and 8) include sub-categories, called Disciplines, which relate directly to Michigan's learning standards for those subjects. This section lists the Disciplines that were assessed.

5

Points Earned/Points Possible — This column describes the number of test items your student answered correctly (left-side number) compared to the total number of items tested (right-side number) in each Discipline for science and social studies. For example, a student whose point score is 5/7 correctly answered five of seven items.

6

On Track for Career and College — Students who reach "Proficient" or "Advanced" levels meet or exceed grade-level expectations in the assessed content and are on track to be career- and college-ready when they graduate from high school. Knowing this information now can help you start working early with your student's teacher to ensure that your student is ready for what comes next.
